---

2024.07.30 Call with Vitaliy Romanovich, Rebecca Dell, Sheb Swett, Derek Wikstrom, Mike Maniscalco

- VR has done many searches; VR has a general recollection of the search of Fokin's devices, such as remembering the terminal they were in; VR was present for the search, but he was not trained to use the machine that was used to conduct the extraction; James Croissette did the extraction
  - Extraction has limited information, which results in an excel spreadsheet, which includes phone identifiers, call logs, SMS messages, maybe emails
  - A full extraction would have taken hours or days
- EMR is used to document type of search that took place; it is internal documentation with limited information
- VR was the liaison with FBI and CBP
- VR was present because he speaks Russian, but he does not recall anything specific from review

Rebecca T. Dell
